Topic # 44

Daylight Saving Time HAS ENDED.

Clocks moved back one hour on Sunday, November 1, 2026, so it's now darker earlier in the evening.

WHY IT MATTERS

Deer are more active in the fall, and with earlier darkness, the chance of a car vs. deer collision is higher.

DRIVE DEFENSIVELY. REDUCE YOUR RISK.

BE ALERT

Watch for deer at dawn and dusk, especially in wooded areas and near open fields.

SLOW DOWN

Reduce your speed, especially in areas with "Deer Crossing" signs.

USE HEADLIGHTS

Use high beams when appropriate to spot deer earlier.

IF A DEER ENTERS YOUR PATH

Brake firmly and stay in control of your vehicle. Do not swerve into another lane or off the road.

EXPECT MORE

Deer often travel in groups, so if you see one, others may be nearby.

REMEMBER:

- Daylight Saving Time has ended — it gets darker earlier.
- Deer are more active in the fall.
- Stay alert, slow down and be ready to react.
- Use your headlights and scan the road ahead.

Stay Alert. Drive Smart. Share the Road.
