FIRST FROST, HIDDEN ICE!

Slow Down Before Roads Turn Slippery

Black ice may look like wet pavement. Bridges, shaded roads and early mornings deserve extra caution.

SLOW DOWN EARLY

Reduce speed before bridges, ramps and turns.

LEAVE EXTRA ROOM

Increase following distance; icy roads take longer to stop.

DRIVE SMOOTHLY

Avoid sudden braking, steering and acceleration.

SKIP CRUISE CONTROL

Keep manual control when roads may be icy.

CHECK BEFORE YOU GO

Clear windows and lights; check tires, wipers and washer fluid.

WATCH YOUR STEP, TOO!

Parking lots, loading docks and walkways may freeze before main roads. Report icy spots.

If the road looks wet near freezing, treat it like ice.
